

MODIFICATION OF LUBRICANT PROPERTIES
IN AN OPERATING ALL LOSS LUBRICATING SYSTEM

5

Abstract of the Disclosure

10 A marine diesel engine system includes a diesel engine having a plurality of cylinders. The system also includes, proximate the engine, a primary engine lubricant and an additive selected from certain alkylamine-alkylphosphates, 500 TBN calcium sulfonate and mixtures thereof. A means for blending the lubricant and additives into a mixture for introduction into a
15 cylinder is provided. Thus lubricant properties may be modified depending upon engine conditions.
